Work and Research Interests

Cloud Computing Efficiency, Data Sciences, Big Data, Information Retrieval, Machine Learning and Data Mining, with an emphasis on Machine Learning, Data Analysis, information extraction, classification and web crawling.

Education

2009-2012 **Ph.D. Computer Science**, Federal University of Amazonas - UFAM, December 2012.

Thesis Title: Unsupervised Information Extraction by Text Segmentation

Advisor: Dr. Altigran Soares da Silva

Comitee: Dr. Divesh Srivastava, Dr. Alberto Laender, Dr. Caetano Traina Jr., Dr. João Cavalcanti

2008-2009 **M.Sc. Computer Science**, Federal University of Amazonas - UFAM, April 2009.

Dissertation Title: A flexible approach for extracting metadata from bibliographic citations

Advisor: Dr. Altigran Soares da Silva

2004-2007 **B.S. Computer Science**, Federal University of Amazonas - UFAM, December 2007.

Employment

2017-Present Principal Software Engineer Manager (Machine Learning Specialist) - Azure Compute - **Microsoft**, Redmond, WA

Project(s):

- Resource Central - A Machine Learning and Prediction Serving system for Efficient Resource Management.

2016-2017 Senior Software Engineer (Machine Learning Specialist) - Azure Compute - **Microsoft**, Redmond, WA

Project(s):

- Applying Machine Learning to empower and manage Azure Data-centers and compute resources.

2014-2016 Senior Data & Applied Scientist - OneDrive and XBOX - **Microsoft**, Redmond, WA

Project Lead:

- Text analytics - Consumer Intelligence
- XBOX Studios and Live - Data Analysis and Machine Learning
- User Segmentation

- 2013-2014 Visiting Researcher - Microsoft Research - **Microsoft**, Redmond, WA
- Project(s):**
- Database Column Annotation
 - Tuning procedures from Schema Matching systems
- Contributions:**
- Proposal, Implementation and Development of a New Data Mining System in C# to perform Database column annotation using corporate data.
 - Implementation and Development in C# of a Optimization Tuning algorithm that is being tested in a Microsoft's Schema Matching systems.
- 2009-2013 Co-Founder and Chief Scientist at **Neemu Technologies**, Manaus, Brazil
- Project(s):**
- E-commerce product classification systems.
 - Crawling and Extraction of product specifications.
 - Enrichment and Data cleaning of E-commerce catalogs.
- Contributions:**
- Proposal, Implementation and Development of a state-of-the-art Machine Learning product classification system in JAVA used in e-commerce marketplaces.
 - Design of the architecture of a web-scale system in JAVA that automatically crawls and extract e-commerce information from the web.
 - Implementation of a new system in JAVA to remove noise information from e-commerce catalogues, mostly related to product specifications.
- Summer 2012 Research Intern within the Database group, **Microsoft Research**, Redmond, WA
- Project(s):**
- Memory management in streaming environments.
- Contributions:**
- Proposal, Implementation and Development of a memory management component in C# that enable streaming systems to increase their performance in single machines.
- February 2012 Visiting Researcher within the **Polytechnic Institute of New York University - NYU**, New York, NY
- Project(s):**
- Entity Extraction and Tracking in social networks
- Contributions:**
- Proposal and Implementation of a prototype in Perl that uses machine learning to allow the automatically extraction and tracking of entities (celebrities, enterprises, places) that are mentioned in Twitter.
- Summer 2009 Visiting Researcher within the Database Group, **University of Alberta - UofA**, Edmonton, Canada
- Project(s):**
- Flexible Data Exchange
- Contributions:**
- Proposal and Implementation of a system in JAVA that enables non-expert users to exchange their XML data in a Peer-to-Peer context relying on data mining methods.

2005-2012 Research Student within the Database and Information Retrieval Group, **Federal University of Amazonas - UFAM**, Manaus, Brazil

Project(s):

- Metadata Extraction from Bibliographic Citations
- Blocking Algorithms for replica detection
- Information Extraction from unstructured data records

Contributions:

- Proposal and Implementation of a state-of-the-art system in JAVA that performs metadata extraction from Bibliographic Citations.
- Proposal and Implementation of a Blocking system in JAVA that uses Genetic Programming to scale out replica detection in database records.
- Proposal and Implementation of 3 state-of-the-art systems in JAVA that, in a fully automatically and unsupervised fashion, allows for the extraction of relevant data from unstructured data records.

Research Impact

The conducted research and its results were published in top tier venues. These results were published in 4 of the top 6 venues of the Databases & Information Systems area according to the rank provided by Google Scholar¹. In July 2016 Google Scholar reported over 150 citations to 6 of the 24 articles listed below.

In the academic realm, the conducted research received Best Paper and Best Demo awards. Also, the PhD Thesis was awarded as the Best Computer Science PhD Thesis of 2012 by the Brazilian Computer Society. Besides, it has received an Award Honorable Mention by the Ministry of Education in Brazil. For this reason, the results were present in tutorials of Brazilian and International venues. The research has produced not only academic results, but also, industrial results. The developed techniques are in use in a startup company called Neemu Technologies², which currently holds the largest market share in search systems for e-commerce in Brazil.

Awards

- 2014 **HackDay 2014**, Winner of the OneDrive & SharePoint HackDay - Microsoft.
- 2013 **SBC Ph.D. Thesis Award**, Awarded by the Brazilian Computer Society - SBC as the best CS PhD thesis of 2012.
- 2013 **CAPES Ph.D. Thesis Award Honorable Mention**, Award given by the Coordination for the Improvement of Higher Education Personnel (CAPES) - Ministry of Education in Brazil.
- 2011 **Best Tool Award**, in Brazilian Symposium on Databases (SBBD).
- 2010 **Master Dissertation Award**, Dissertation ranked among the 11 best at the Brazilian Computer Society Thesis and Dissertation Contest (CTD).
- 2009 **Best Paper Award**, in Brazilian Symposium on Databases (SBBD).
- 2009-2012 **Ph.D. Scholarship Award**, given by UOL Inc.
- 2008 **M.Sc. Scholarship Award**, given by UOL Inc.
- 2008 **ACM SIGMOD Undergraduate Award**.

¹http://scholar.google.com/citations?view_op=top_venues&hl=en&vq=eng_databasesinformationsystems

²<http://neemu.com>

2006-2007 **Youth Potential Research Award**, given by the Computer Science Department to the top five undergrad students with the highest GPA.

Technical Skills

Strong Knowledge on Information Retrieval, Big Data Applications and Machine Learning.

Programming Languages: Java, Perl, C#, PHP and Shell Script

Web Development: HTML and JSON

Databases: MySQL, MongoDB and SQL Server

Programming Tools: Git, Eclipse and Visual Studio

Teaching and Mentoring Experience

2011-2012 **Mentoring**, CS Department - Federal University of Amazonas , Manaus-Brazil.
André Porto, undergraduate student

2011-2012 **Mentoring**, CS Department - Federal University of Amazonas , Manaus-Brazil.
Elton Serra, graduate student

2010 **Teacher**, CS Department - Federal University of Amazonas , Manaus-Brazil.
Course: Foundations and Theory of Computer Science

2009 **Teacher Assistant**, CS Department - Federal University of Amazonas , Manaus-Brazil.
Course: Database Systems

2007 **Teacher Assistant**, CS Department - Federal University of Amazonas , Manaus-Brazil.
Course: Algorithms

Publications

Books (1)

- [1] **Eli Cortez and Altigran Silva**, 2013, Unsupervised Information Extraction by Text Segmentation, In SpringerBriefs in Computer Science - Springer International Publishing.

Refereed Conference Papers (13)

- [2] **Eli Cortez, Anand Bonde, Alexandre Muzio, Mark Russinovich, Marcus Fontoura, Ricardo Bianchini**, 2017, Resource Central: Understanding and Predicting Workloads for Improved Resource Management in Large Cloud Platforms, In Symposium on Operating Systems Principles - SOSP.
